Summary

Quality-focused Software Engineer and Master's student in Applied Computing with hands-on experience in test automation, CI/CD pipelines, and full-stack development. Proficient in Java, Selenium, Python, and modern web frameworks, with a strong foundation in SDLC, STLC, Agile, and DevSecOps practices. Adept at delivering automated testing, containerized applications, and cross-repository pipelines that enhance software reliability and release velocity.

Technical Skills

Languages & Frameworks: Java, Selenium, Cucumber, Gherkin, JavaScript, TypeScript, Python, Node.js, React.js, Next.js, Django

Backend & APIs: RESTful APIs, FastAPI, GraphQL

Databases: MongoDB, MySQL, PostgreSQL, Redis

DevOps & Tools: Git, GitHub, GitHub Actions, Docker, CI/CD Pipelines, Jira, JTMF, Confluence

Methodology: Agile, BDD Framework, SDLC, STLC, Automation Testing

Experience

Quality Engineer Intern

Jan 2026 – April 2026

TD Bank

Toronto, ON, CA

- Automated and fixed 50+ regression scenarios across parallel batch pipelines, improving automation coverage and reducing execution timelines.
- Architected a cross-repo CI/CD pipeline using GitHub Actions and a self-hosted runner via WSL, implementing a DevSecOps quality gate that enabled 100% automated test execution on every code push.
- Migrated test automation framework from Selenium to Playwright, achieving a 35% reduction in execution time and enhancing the stability of the regression suite.
- Built a Java tool to auto-generate XPath and reusable methods, reducing manual script creation time by 70%.

Full Stack Developer

Feb 2023 – Oct 2024

The One Web Technology

Vadodara, Gujarat, IN

- Implemented CI/CD pipelines with automated builds and tests, reducing release time by 50% and achieving a 95% success rate.
- Containerized 5+ applications with Docker, improving deployment consistency and reducing environment setup time by 70%.
- Integrated Redis caching and optimized services, reducing latency by 75% and handling 1,000+ daily active users.
- Conducted 20+ automated test cases and peer code reviews, cutting post-release defects by 40% and improving code reliability.

Software Developer Intern

Jun 2022 – Jul 2022

Tntra Innovation Ecosystem

Vadodara, Gujarat, IN

- Contributed to the setup of CI/CD workflows, reducing integration errors by 60% in development builds.
- Improved code modularity and debugging practices, lowering defect rates by 35% in QA testing.
- Strengthened team collaboration using Git/GitHub workflows and 10+ peer reviews, reducing merge conflicts by 50%.

Projects

AI-Powered Resume Analyzer & Job Matcher

Next.js, TypeScript, MongoDB, Node.js, Tailwind CSS, NextAuth.js, OpenAI GPT-4o, Redis

- Engineered scalable parsing pipelines with 95%+ extraction accuracy, reducing recruiter screening time by 50%.
- Optimized Redis caching and API calls, lowering latency by 75% and improving system throughput by 40%.
- Built role-based dashboards, boosting recruiter insight accuracy by 80% and cutting manual analysis time by 60%.

AI-Powered Interactive PDF Platform

Next.js, TypeScript, LangChain, Tailwind CSS, Clerk, shadcn/ui, Cloudinary

- Developed a secure SaaS platform with AI-powered document interaction and cross-browser compatibility, boosting accessibility and productivity by 35%.
- Integrated LangChain for conversational AI with memory, boosting engagement by 25%.
- Optimized query handling, achieving 80% faster responses and enhancing multi-device collaboration.

Education

Master of Applied Computing (Computer Science)

Jan 2025 – Apr 2026

University of Windsor, Windsor, ON, CA | GPA: 3.61/4

Bachelor of Engineering in Computer Engineering

Jul 2019 – May 2023

Gujarat Technological University, Gujarat, IN | CGPA: 8.18/10
